To whom it May Concern,

Yesterday Morning at Goonhavern Primary School, an interesting object was discovered on the field. The object looks slightly burnt, but it is mainly white and silver. We noticed it has a planet symbol and the letters ESA on it. Luckily, no one got hurt because it looked like it came from space at sonic speed we don't feel safe. Can you help us to identify what this strange thing is? Please can you come to our school? If possible, can you remove the object so we can play on our field safely again?

Yours sincerely  
Bella.
